Sending the same whatsapp message repeatedly by using this module

pywhatkit is a Python library for sending WhatsApp messages for certain time range.

User Interface   **Click here** ☞ 🔗

or use this link-   **https://tinyurl.com/kderty**

Created a portfolio by using HTML and CSS without Bootstrap

HTML
- Tools Used

  Visual Studio Code
- External Resources

  Google Fonts
- Tags Used
  1. Section (It defines a section in a document)
  2. Div (It is used as a container for HTML elements)
  3. A (defines a hyperlink)
  4. Link (often use to link the external style sheet and external resources)

CSS
- Why I Used?

IT can control the layout in multiple websites.

I used Four External CSS file to link HTML by using<Link>tag
- Some of the main Properties I Used.
  1. Overflow(it is used to add Scroll Bar when element content is big)
  2. Hover(when the mouse over on it will show blink effect with the help of transition properties)
  3. Position(Specifies the which position type we want used for an element)
  4. padding(to create space around the element)
